

NAB's petition 04-160 should be rejected. I am paying for satellite radio so I can access all types of news, entertainment channels, weather, traffice, etc. when I want to. Our freedoms in this country are becoming so limited because of government organization like yourself. You think you have the right to limit what we can see, hear or say. But one thing about radios and tvs is people have the choice not to listen or watch if they don't want to.
